- f. Carbon dioxide is a _____.
- g. Some people have a _____ that is bad for the environment.
- h. She has visited a lot of _____ countries in Africa.
- i. Oxygen is one of the gases in the Earth's _____.
- j. I ride a bicycle, because it's more _____ than driving a car.
- k. People often talk about _____ in the Amazon and other parts of the world.
- l. The United States, Germany and France are all _____ countries.

2. Read the following reports, and answer the questions bellow (provide full answer).

Linda

Global warming shows us the effect that human beings are already having on the planet – it’s happening because of all the greenhouse gases we put into the atmosphere from industry, planes and cars, and because of other things like deforestation. Soon, millions of people will start leaving some parts of the world because it will be impossible to live there anymore.

Michael

If we want to be more environmentally friendly we can recycle or drive cars that pollute a bit less, or even use fewer plastic bags. However, I really don’t know if these small things are going to be enough.

Rob

I don’t think there’s a solution to the global environmental crisis. The world’s population is now too high, and the amount of energy being consumed is increasing all the time. It’s obvious that one day, soon, we’re going to run out of natural resources.

- a. Who is the most optimistic about the global environment situation?

- b. Why does Rob believe there is no solution to the problem?

- c. What does Rob think is going to happen soon?

- d. Linda mentions four things that create extra greenhouse gases. What are they?

- e. What does Michael mean by “small things”? In your opinion, are there any “bigger” things people could do to help the environment?
